Finance Committee Report Q1 2024

ECONOMIC SUMMARY

Interest rates

Interest rates moved higher in the first quarter, retracting some of Q4's dramatic decline. The market expected seven (25 basis point) rate cuts at the start of the year but after two months of discouraging inflation data, reduced its expectation to three, aligning traders with the Fed's December's dot plot. The 2-year treasury yield increased 34 basis points (bps), starting the quarter at 4.25% and ending at 4.59%. The 10-year treasury yield increased 32 bps, starting the quarter at 3.88% and ending at 4.20%. The yield curve has been inverted since July 2022, which is 21 months and counting.

Inflation

After months of steady progress towards the Fed's 2% inflation target, first quarter's inflation data reversed course. While core goods and food inflation have returned to pre-pandemic levels, core services inflation has remained stubbornly elevated at 3% for the last 9 months. Services inflation will need to fall for inflation to reach the Fed's target. However, the recent inflation surprises have not undermined the Fed's confidence in the "sometimes bumpy road toward two percent," according to Chair Powell at the March press conference.

Strong job market

Non-farm payrolls have continued to grow at a strong pace so far in 2024. Non-farm payrolls increased 256k in January, 236k in February, and 315k in March for an average of 269k per month. The unemployment rate remains low at 3.8%. Job openings remain elevated compared to pre-pandemic levels but have been steadily trending lower since the peak in late 2021, bringing the labor market into better balance. The quit rate has fallen below where it was in 2019, suggesting less labor turnover which will help lead to slower wage growth, less time training new hires, and more productivity in the future.

"No Landing"?

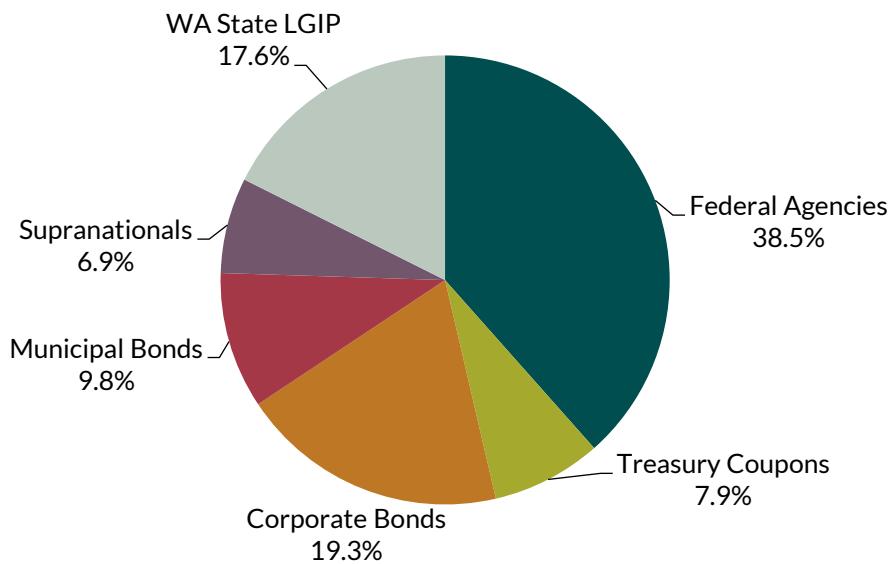

The "no landing" phrase just means the jury is still out on inflation. Toward the end of last year, it looked like inflation was heading decidedly towards 2% and the economy was still strong giving thought that a "soft landing" might be possible. However, since then, inflation has stalled its progress and growth has slowed. Q1 real GDP growth came in at 1.6% (less than the 2.5% expected), due to higher-than-expected inflation. Domestic demand remained strong at 2.8%, but for how much longer? Credit card balances continue to increase, reaching new record highs while savings rates decline and delinquency rates rise for all debt types except student loans.
