Clark County is conducting a short survey to assess the recreational needs of community residents to update its Parks System Plan.

The new Plan will establish a path forward for providing high quality, community-driven parks, trails, open space and recreation amenities throughout the county. The update will establish goals and priorities and recommend specific projects for the county’s parks and recreational lands for the next 6-10 years. Final review and adoption of the Plan tentatively is scheduled for August 2015.

The survey consists of 14 questions regarding current use of facilities, preferred activities, and support for future improvements. It takes on average about five minutes to complete, and residents of all ages are encouraged to participate.

Thank you in advance for participating!
