JULY 2007

A Message From Clark County Government About a Project in Your Neighborhood

CONSTRUCTION OF CURTIN CREEK ENHANCEMENT AREA

A Water Resources Project

The Curtin Creek Enhancement Area is a water resources project along a half-mile stretch of Curtin Creek (see map). The 30 acre enhancement project includes creek restoration, wetland and habitat planting, and construction of stormwater wetlands. Upon completion the project will improve water quality and improve habitat for fish and wildlife in the area.

WHERE The project is located in the Curtin Creek floodplain north of NE 99th Street, between NE 82nd Avenue and NE 87th Avenue.

WHY The project serves three purposes:

- 1) Improves water quality with the construction of stormwater wetlands to treat run-off from near-by roads.
- 2) Improves habitat and enhances wetlands by planting the area with native trees and shrubs.

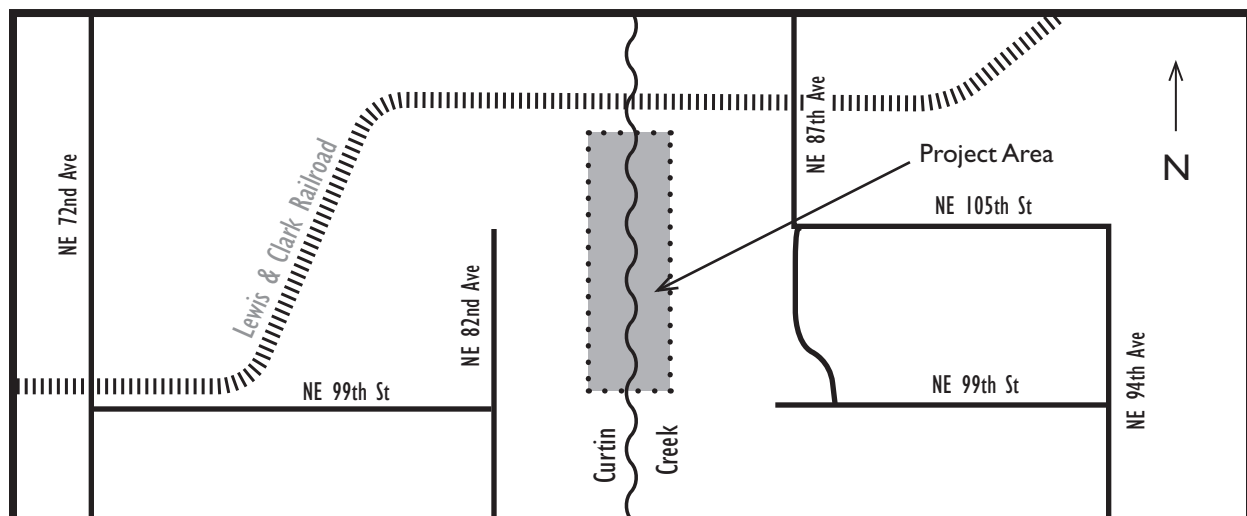

3) Improves fish habitat by reconstructing Curtin Creek.

WHEN Construction is scheduled to begin in late July and is expected to last until the fall of 2008.

WHO Clark County is the lead agency for the construction of these improvements. Following a competitive bidding process the county awarded the construction contract to Tapani Underground, a general contractor from Battle Ground.

TRAFFIC DURING CONSTRUCTION

Traffic in the area will be impacted during the construction of this project and periodic delays may occur. Trucks hauling excavated material should be anticipated on NE 99th Street, NE 94th Avenue, and NE 87th Avenue. Construction signs will be posted on haul roads near the construction area.
