### **Revenue forecast delays construction**

Clark County recently received updated financial projections for the Greater Clark Parks District and has determined that construction will not start on East Minnehaha Neighborhood Park in 2012, as originally planned.

The ongoing economic downturn is projected to cause a significant reduction in the amount of property taxes collected by the Greater Clark Parks District for maintenance and operations of its parks. As a result, the county will slow down its park development program. It is not financially prudent to build all the remaining parks when projections indicate the county may have difficulties maintaining its existing parks. This park project will be put on hold after the concept planning process is completed this spring. Design, permitting and construction will move ahead when funding is available.

Neighbors will be notified when work resumes, but it may not be for a year or possibly longer. The county will carefully monitor revenues and expenditures, both projections and actual numbers, and make adjustments as needed.
