Summer season is....

Photo source: D. McGuire

...fire works season.

**After the fun of fireworks, make sure to sweep up!
The debris contains pollutants that can damage streams.**

Do your part to keep debris and chemicals OUT of storm drains

**... sweep up debris, NEVER wash it
to a nearby storm drain.**

Before the next rain, make sure to clean up any fireworks debris, including wrappers, sticks and ashes.

- Make sure that all debris has been thoroughly extinguished
- Secure all debris before putting in a trash container
- Storm drains may lead directly to creeks, streams and rivers.....UNTREATED!
