

# Summer season is....

# ...yard care season.

When caring for your yard this summer, minimize materials that can wash off pavement to the storm drains.

**Do your part to keep debris and chemicals OUT of storm drains .....**

**... direct all water to landscaped areas to soak into the ground**

Dirty and soapy water need to be directed AWAY from storm drains. Minimize use of cleaners and sweep up debris.

- Keep fertilizers in the garden beds, not on pavement
- Sweep up lawn cuttings and debris to put in compost
- Storm drains lead directly to creeks, streams and rivers.....  
**UNTREATED!**
