

Fostering Healthy Community Connections

School Linkup is an easy to use web tool which connects schools with their community and assists them in building relationships which help support the needs of their students and families.

How does it work? It's as easy as 1, 2, 3...

1. Schools are added to School Linkup and then add their community members (parents, staff, businesses, churches, etc) who will receive notifications of new needs or community members may log on and discover needs for themselves.
2. As new needs are discovered, they are added to the School Linkup system and community members are notified via email.
3. As community members receive email notifications, they can choose which needs they are able to respond to.

Our School Linkup Page is located here:
