

HIGHWAY MAINTENANCE CREW CHIEF

JOB PURPOSE AND SUMMARY

Highway Maintenance Crew Chiefs establish work priorities, analyze work requirements, determine procedures and methods, and assign highway maintenance employees to specific tasks in regard to Clark County road rights-of-way. The work requires record keeping and report preparation for highway maintenance projects. Employees make key contributions to annual planning of work in the specialized area of road operations. Employees are expected to make independent decisions and judgments in the performance of their duties. Work performed by incumbents in this classification is reviewed periodically and/or at completion by an Operations Superintendent.

CLASSIFICATION DISTINCTIONS

Highway Maintenance Crew Chiefs supervise the work of Highway Maintenance Specialists, Highway Maintenance Workers, Traffic Control Technicians, and Heavy Equipment Operators. Incumbents prioritize, assign, coordinate, monitor and evaluate work; provide technical assistance; resolve minor work or personnel problems; and make recommendations to the Operations Superintendent regarding employee evaluations, discipline, training, major job reassignments and recruitment selection.

Highway Maintenance Crew Chiefs supervise the specialty areas of traffic sign installation, maintenance and street striping, drainage, water quality, and special maintenance projects of such size, duration, and complexity to require leadership expertise.

KEY OR TYPICAL TASKS AND RESPONSIBILITIES

- Plans and arranges for maintenance projects within assigned area, i.e. traffic sign installation, maintenance and street striping, drainage, water quality, and special maintenance projects.
- Conducts annual review of assigned specialty area to establish and prioritize required maintenance and repair.
- Determines project elements, identifies crew size, equipment and supplies needed. Reviews job specifications with supervisor to assure requirements are met.
- Determines necessary supplies, orders supplies, conducts supplies inventory. Conducts labor and equipment rental cost estimates for projects, develop bids.
- Contributes to overall Maintenance Division planning.

Clark County, Washington

- Maintains a variety of reports and records which may include; job costs, materials used, time sheets, project schedules, and other reports regarding work accomplished.
- Coordinates implementation of maintenance projects and activities.
- Examines and interprets blue prints and engineering plans to determine proper procedures.
- Assigns workers to specific tasks; communicates procedures to be used, restraints, deadlines and goals to crew members. Ensures safety practices are used in performance of job duties.
- Coordinates with Fleet Services Division to insure that equipment is available when needed.
- Monitors project/activity progress insuring timely completion of work. Directs work in progress, assesses procedures applied and adjusts as circumstances indicate.
- Performs maintenance tasks and operates equipment as needed.
- Confers with Clark County utility representatives for determination of utility placement; modifies project plan as may be indicated.
- Resolves problems in work activities and/or between crew members.
- Explains project/activity to property owners, utility representatives, and the general public; responds to and resolves complaints regarding crew activities.
