**Lawn**
- Mow with grass clippings removed from paved areas.
- All areas to be maintained at a height of 1-2 inches.
- Mow at least once a week or as needed.

**Vegetation**
- Use drought-tolerant species.
- Watering during dry periods.

**General Landscape Notes**
1. The landscape plan is preliminary and intended to serve as a guide only. The shrub, tree, and plant species listed are preliminary and are subject to change based on availability and contractor's discretion.
2. All plants and trees shall conform to Clark County design standards and the American Nursery Standards. Any plant not in accordance with accepted nursery industry standards shall be subject to the approval of the Community Planning and Development Division.
3. All plantings shall be planted in soil that is at least 12 inches deep and free of debris.
4. Mulch application is recommended to help retain moisture and reduce weeds. Mulch shall be at least 2 inches deep and extend 1 foot beyond the plant base.
5. Irrigation of bare roots for newly planted shrubs and trees is recommended. Irrigation shall be regulated to prevent water loss.
