

Application for Certificate of Appropriateness or Waiver of Certificate

The applicant agrees that all work performed in conjunction with a Certificate of Appropriateness will be in conformance with the Design Guidelines and *The Secretary of the Interior's Standards/Guidelines* if not otherwise specified and no changes or additions will be made without approval of the Historic Preservation Commission or by granting of a new Certificate of Appropriateness.

Name of Applicant: Annette Vary-Getty Date: 7-24-18

Applicant's Mailing Address: 1919 NE 78th St Vancouver, WA 98665

Telephone Number: 360-397-6060 ext 5709 Email: Annette.vary-getty@clark.wa.gov

Property Address: 1919 NE 78th St Vancouver, WA 98665 Parcel Number: _____

Name of Property: Clark County

Name of Owner: Clark County Telephone #: _____

Name of Architect: _____ Telephone #: _____

Name of Contractor: McGee Blinds and Awnings Telephone #: 503-235-1188

Type of Work (Check All That Apply)

- Alterations/Additions New Construction
- Demolition Relocation

Submission Requirements Checklist

The application along with all supporting information must be filed at least thirty (30) days prior to the next regularly scheduled meeting of the Clark County Historic Preservation Commission. The Commission meets the second Tuesday of each month at 6:00 pm at the O.O. Howard House located at 750 Anderson Street, Vancouver, Washington.

- Application.** Electronically submit the application and all supporting documentation.
- Detailed Description of Project.** Attach a detailed and typewritten description of the activity for which you are seeking a Certificate of Appropriateness.
- Drawings, Samples, Site Plans, Etc.** Submit plans, elevations, or other illustrative information necessary to explain the application. Such information would include detailed plans showing both existing and proposed conditions, material samples or product information, description of building materials, landscaping/site plans, photographs, etc. Architectural drawings, construction plans, etc. should be printed on paper no larger than 11"x17".

Refer to the Clark County Historic Preservation Rules & Procedures for Design Review for further instructions on information to be submitted, as well as important notes related to the Certificate of Appropriateness process. Failure to supply adequate documentation or required materials will result in delays in processing the application and/or denial of the request. Revisions made to applications after submittal deadline and prior to the Commission hearing may be considered at the following month's hearing.

I certify by my signature below that the information in this application is accurate and complete. Clark County Historic Preservation staff has permission to copy materials, including architectural drawings, necessary for the review of my Certificate of Appropriateness application. I also acknowledge the fact that it will be necessary for the commission members and/or staff to make site visits at any time before, during, or after the COA application review process, including for enforcement purposes.

We are seeking a certificate of appropriateness for an awning to be affixed on the West side of the WSU Clark County Extension. The awning is necessary for an ongoing maintenance issue.

This ongoing West side entrance door maintenance issue has been there since the West was used as an entrance again.

The ADA ramp and door was added onto the building in 2010. The door itself was replaced again in 2014 and it might be replaced again 2018 but they have painted it instead for a quick fix.

The west side of the building tends to get a lot of exposure from the elements sun, wind, snow, and rain all which causes that door to break down, get brittle and slam into the frame; more so than the other entrances.

When the door gets run-downed the wood becomes brittle and causes it to be untouchable except for the metal door plate. The sun cracks the door, rain enters through cracks causing larger cracks where mold, mildew and splitters are formed. These splitters are harmful to anyone who uses this door delivery people, staff and mostly since there is no other entrance for them the ADA population.

An awning would cover and protect that West door from getting damaged in the first place and then facilities wouldn't need to plan for a replacement door every four years and with the door being in better shape any injuries from the condition of the door would be averted.

The awning would also provide any cover from the elements to people when the door is open for deliveries, moving furniture or other large objects and most notably the ADA population.

The building had on the West side a matching porch like the East side, you can see where the porch was in the building photos but with the build of the ADA ramp the awning will be a nice compromise.

This would be placed on the West side outer wall between the windows and under the eave but above the outside light. This awning would be bolted only onto the structure with no long term building side effects. If it needed to be removed or changed it could be done relatively easily.

The material would be an eight foot by six foot by one and half foot brown or tan Sunbrella fabric supported with powder coated one and quarter inch legs and one inch framework.
