Learn about **Planning for Mobility needs**

Finding effective ways to meet the transportation needs of the increasing numbers of older residents will be critical for our local governments. Learn more about what goes into planning for all modes of transportation and how we can improve the mobility options for seniors who want to remain independent as long as possible.

Matt Hermen, a transportation planner with Clark County, will describe how multiple modes of transportation; biking, walking, vehicles and buses; are planned for locally to meet the needs for present and future populations. He will also discuss the county's transportation successes and challenges.
