Section IA General Information

1. Introduction
   We are in the process of updating and modernizing the Clark Regional Emergency Operations Center. As part of this update we are replacing our audio visual system in an effort to increase our response and coordination capabilities. The Emergency Operations Center will support Clark County and the seven cities within the county in the event of a large scale emergency or disaster. The space will also serve as a multipurpose conference room and workspace when not activated for response and coordination purposes.

2. Background
   The Emergency Operations Center relies on a robust audio visual system to share information with key stakeholders who are coordinating response efforts to incidents within Clark County. Our current system consisted of three overhead projectors that projected on a high wall in the room. The system had three wired inputs to PCs throughout the space. Currently only one projector works and we only have one input available to display. With our current system we are unable maximize our display options which limit our ability to create a common operating picture.

3. Scope of Project
   Replace our current projector system with a new system that meets the display needs of the space. The video display system will utilize the majority of the wall space in the west wall of the emergency operations center. The system will need to have the ability to simultaneously display up to five independent sources. The system will allow up to four wirelessly connected sources from a PC, Mac, Android, IOS, Chrome, and a wired PC and cable tuner connections. Connected devices must not lose any functionality, including internet connections. The new audio system may utilize the existing wall mounted JBL speakers and have the ability to project audio from any of the connected inputs. The system will include a wireless microphone connection.

   • Remove or reuse the current three projectors and mounting hardware
   • Mount all equipment
   • Route cabling for all equipment
   • Integrate current speakers into sound system
   • Provide a wireless microphone system
   • Include a HDMI/DVI/DP input at the equipment rack
   • Include a VGA input at the equipment rack
   • Include at least two HDMI inputs at the equipment rack
   • Include a touch screen controller at the equipment rack
   • Ensure control system is programed and configured for use
   • Train key personnel on the operation of the system
   • Clearly state warranty on equipment
   • Clearly state warranty on installation and services provided
   • Clearly state manufacture make and model of proposed equipment

4. Project Funding
   The total approved budget for the described project is not to exceed $30,000.

   The Proposers proposal shall include the Proposers true estimated cost to perform the work irrespective of the budgeted funds for this work.
