Appendix C - GIS Methods

In creating new mapping products for the 2014 Conservation Areas Acquisition Plan our objective was to maintain the core vision of the 2004 plan. However, we also sought to both extend the physical extent of the largely riparian-based network beyond the 2004 Tier 1 project areas as well as disconnecting the updated vision from single-source funding limitations.

Project Area Boundaries

We divided Clark County into 19 subareas using 6th level hydrologic unit boundaries from the US Department of Agriculture Natural Resource Conservation Service. The only significant deviations from the subwatersheds are in the Vancouver Lake Lowlands, Columbia South Slope, Whipple Creek, and Gee Creek/Flume Creek areas, where we manually digitized boundaries using physical and cultural features.

High Value Conservation Lands Layer

To extend the physical extent of the network, we added layers thematically as follows:

1. Lower Columbia Fish Recovery Board (LCFRB) Ecosystem Diagnosis and Treatment (EDT) Priority Tiers
   We used the stream systems as the backbone for the network of high value conservation lands in Clark County. The LCFRB compiled results from EDT models that rank salmon-bearing streams based on their priority for habitat conservation and restoration. The LCFRB rankings are expressed as Tiers, with 1 being highest priority and 4 the lowest priority.

2. Variable width buffers based on EDT Tier
   Using the EDT stream reaches, we assigned variable-width buffers based on the level of priority as follows:

   Tier 1 = 250’
   Tier 2 = 250’
   Tier 3 = 150’
   Tier 4 = 150’

   These buffers form a corridor around each stream and the associated riparian habitats.

3. FEMA 100 year floodplain
   Using FEMA’s flood plain data (known as digital Q3 Flood Data) for Clark County, we extracted 100 year floodplains to capture additional potential habitat areas falling outside the buffered EDT stream reaches.
4. Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) Riparian Habitat
The WDFW PHS data consists of polygons that represent different types of important habitats. We selected all polygons specified as Priority Riparian Habitat and added these to the network.

5. US Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) Wetlands within 200’ of Streams
Using an approach similar to the Intertwine Alliance’s Regional Conservation Strategy we selected all wetlands intersecting the buffered EDT streams, then buffered the selected wetlands by 30 meters and added them to the network.

6. PHS non-riparian habitats (excluding elk and mule deer winter range)
In addition to the riparian zones mapped in the WDFW PHS, we selected upland habitats intersecting the network, but excluded elk and mule deer winter range, which were determined to be too extensive to incorporate into the network. The non-riparian habitats intersecting the network include:

- Bald Eagle
- Cavity-Nesting Ducks
- Cliffs/Bluffs
- Dusky Canada Goose
- Great Blue Heron
- Islands
- Oak Woodland
- Old-Growth/Mature Forest
- Osprey
- Purple Martin
- Sandhill Crane
- Snag-Rich Areas
- Talus Slopes
- Tundra Swan
- Urban Natural Open Space
- Waterfowl Concentrations
- Wetlands
- Wood Duck

7. 2004 Aggregate Benefits Layer (consreet)
This data represents the original network of high value conservation lands developed for the 2004 Conservation Areas Acquisition Plan.

8. Undeveloped parcels
The network was extended to include all undeveloped parcels where the boundary captures more than half the land area of the parcel.

9. Developed Parcels
Developed parcels were defined as parcels with an assessed improvement value greater than or equal to $50,000. All developed parcels 20 acres in size or larger where the boundary captures more than half the land area of the parcel were added to the network.
10. Public Lands
We incorporated all public and protected lands which lie fully or partially inside the network, with the exception of Washington Department of Natural Resources (DNR) lands.

Additional Layers
Throughout the process we used additional data sources to inform our decision making and confirm the validity of our results. These sources include, most notably, the High Value Lands and High Value Riparian Lands models from the Intertwine Alliance’s Regional Conservation Strategy.

Compilation
We merged all of the above described inputs together to create a single layer representing aggregate benefits, or high value conservation lands in Clark County. The following maps depict how the various layers were combined within the Salmon Creek (upper) subarea in order to arrive at the High Value Conservation Lands layer.

Map Notes: Public lands are non-DNR lands intersecting the network.
A variety of funding opportunities are available to counties in the state of Washington to help acquire and improve conservation lands. These include both grants and non-grant programs that generate revenue or otherwise can help achieve conservation lands protection and improvement.

This manual includes summaries, in table format, of 26 grant programs. Entries include information about managing agency, purpose, eligible projects, grant limits, matching requirements, application deadlines and cycles, and available grant amounts and/or grant history. It should be emphasized that this kind of information can be a useful screen to help determine whether a grant program might be a good match for individual projects. However, grant applicants should review more completely grant guidelines, evaluation criteria, and other background materials, as well as communicate with grant program managers, before fully committing to grant development.

This manual also includes summaries of nine other programs that generate funds or otherwise achieve conservation lands protection. These include, for example, Conservation Futures, Conservation Areas Real Estate Excise Tax, and the state’s Trust Lands Transfer Program. A directory of fund sources appears on the following page.
Fund Sources – Grants
Acres for America – NFWF
Aquatic Lands Enhancement Account – WA RCO
Coastal Protection Fund (Terry Husseman Account) – WA DOE
Community Forest Trusts – WA DNR
Cooperative Endangered Species Conservation Fund (HCP Land Acq. Grants) – USFWS
Cooperative Endangered Species Conservation Fund (Recovery Land Acq.) – USFWS
Farm and Ranchlands Protection Program – NRCS
Forest Legacy Program – USFS
Habitat Restoration Program – LCREP
Land and Water Conservation Fund – RCO/NPS
Lewis River Aquatics Fund - PacifiCorp
Neotropical Migratory Bird Conservation Act (Traditional & Pilot Programs) - USFWS
North American Wetlands Conservation Act (Small Grants) – USFWS
North American Wetlands Conservation Act (Standard Grants) – USFWS
Salmon Recovery Program – SRFB/LCRFB/RCO
Water Quality Financial Assistance Program – WA DOE
(Water Pollution Control Revolving Fund)
Wetlands Reserve Program (Permanent and 30-Year Easements) – NRCS
Wetlands Reserve Program (10-Year Restoration Cost-Share) – NRCS
Whole Watersheds Restoration Initiative – Ecotrust and Partners
WWRP Critical Habitat – WA RCO
WWRP Farmland Preservation – WA RCO
WWRP Local Park – WA RCO
WWRP Riparian Protection – WA RCO
WWRP Trails – WA RCO
WWRP Urban Wildlife Habitat – WA RCO
WWRP Water Access – WA RCO

Fund Sources Public – Other Tools
Conservation Futures
County Bonds (Voted GO, Councilmanic, Revenue)
Impact Fees
Lid Lift
Real Estate Excise Tax Options
Real Estate Excise Tax – Conservation Areas

<tbody>
<tr>
<td>Acres for America National Fish and Wildlife Foundation in Cooperation with Walmart Stores</td>
<td>Provides funding to help conserve large, landscape-level areas that are important habitat for fish, wildlife and plants through acquisition of interest in real property</td>
<td>• Acquisition/preservation</td>
<td>Max: $1M</td>
<td>Min: 1:1</td>
<td>Annual. Pre-proposal: June; Proposal: Aug.</td>
<td>Program provides $2.5M annually. Generally tries to fund 3-4 projects/year. Only one project in OR to date; none in WA.</td>
<td>• NFWF’s “premier land conservation program” • Walmart’s goal to offset footprint of domestic facilities on at least acre by acre basis • Preference given to projects that are part of adopted cons. Plans • Support from public agencies and/or NGO’s desirable • Projects should support landscape level conservation • Public access preferred, not required • Fee or easement transaction must qualify for “conservation purposes” as defined by IRS Code Section 170(h)</td>
</tr>
<tr>
<td>Aquatic Lands Enhancement Account: WA Recreation and Conservation Office</td>
<td>Protect, restore and improve aquatic lands for public purposes; provide and improve access to aquatic lands</td>
<td>• Acquisition/preservation • Site restoration • Viewpoints • Benches/tables • Interpretive signs/kiosks • Fishing piers/platforms • Non-motor trails/paths • Open water swim areas • Parking lots/entry roads • Restrooms</td>
<td>Acq: $1 million Dev: $500K Restore:$500K Combination: $1 million of which not more than $200K may be for dev/restoration.</td>
<td>Min. 50% total project At least 10% of total project cost must come from non-state, non-federal sources</td>
<td>Every 2 years, in even years</td>
<td>FY 2012: 12 projects received $6,608,000. High: $1,000,000 (A) Low: $200,000 (D) About $5 M each grant cycle.</td>
<td>• Projects must be on navigable waterways • Funds derive from leasing of state-owned tidelands and shore lands • Property acquired, restored, or developed with ALEA grants must be kept for public recreation use forever</td>
</tr>
<tr>
<td>Coastal Protection Fund – Terry Huseman Account WA Department of Ecology</td>
<td>Restore or enhance environmental, recreational, archaeological, or aesthetic resources for WA citizens. Typical projects address water quality issues and fish and wildlife habitat protection or enhancement needs</td>
<td>• Acquisition/preservation • Restoration/enhancement</td>
<td>$50k</td>
<td>None</td>
<td>Generally 1 or 2 times per year; more often if fund balance allows</td>
<td>• Fund source is penalties paid on violations under Water Pollution Control Act • Timing of RFP’s depend on fund balance in THA by sub-region • Projects are evaluated based on regional water quality, restoration, improvement and monitoring priorities</td>
<td></td>
</tr>

<tr>
<td>Community Forest Trust WA Department of Natural Resources</td>
<td>Preserve working forests that are at high risk of conversion and that provide important community benefits (e.g. wildlife habitat, clean water, recreation) that may be lost</td>
<td>Acquisition/preservation (sites may include private and state trust lands; private land acquisitions must involve willing sellers)</td>
<td>This is a new program; grant limits have not been established</td>
<td>Min: 50% of non-timber real estate value</td>
<td>To be determined. DNR issued call for pilot proposals in May 2012</td>
<td>This is a new program, with no grant history. Additional information on the program’s roll out and the status of pilot projects can be found on the DNR website.</td>
<td>New program authorized in 2011 under RCW 79.155. DNR issued initial call for proposals in May 2012. DNR will hold and manage property. Community-supported management plans will be developed for each site. Sites must generate enough revenue to support management actions. Enhancements for wildlife, recreation, etc. will be allowed if consistent with management plan.</td>
</tr>
<tr>
<td>Cooperative Endangered Species Conservation Fund (Sec. 6 of ESA) Habitat Conservation Plan Land Acquisition Grants US Fish and Wildlife Service in partnership with WDFW &amp; DNR</td>
<td>Protect habitat that supports ESA-listed species managed by USFWS. Grant category has three primary purposes: complement conservation provided by a permitted HCP; provide important benefits to listed species; and provide important benefits to ecosystems that support listed, proposed, and candidate species</td>
<td>Acquisition/preservation</td>
<td>$6M per HCP</td>
<td>Min. 25%</td>
<td>Annual</td>
<td>FY 2012: WA received $3.7M for 1 project FY 2011: WA received $3.5M for 1 project FY 2010: WA received $13,471,700 for 5 projects</td>
<td>Projects must complement approved Habitat Conservation Plans. WDFW and DNR are lead agencies at state level. Grants must support listed species managed by USFWS (salmon managed by NMFS are not primary focus). Sponsors must purchase land at fair market value from willing sellers. Interest must be in perpetuity. Listed plants may be target species. Program is highly competitive; 3-5 listed species need to benefit</td>

| Neotropical Migratory Bird Conservation Act (Core Program) U.S. Fish and Wildlife Service | Supports protection and recovery of neotropical migratory birds. (A neotropical migratory bird is “one that breeds in the continental United States or Canada and spends the boreal winter in Mexico, Central America, the Caribbean, or South America.”) | • Protection and management of neotropical migratory bird populations  
• Maintenance, management, protection, and restoration of habitat  
• Research and monitoring  
• Law enforcement  
• Outreach and education | Max: $200K  
Min: Requests under $15K are discouraged | 3:1(Non-fed to Fed. Cash only.) | Annual | 2012: 28 projects funded. Scope of 8 projects had entire or partial U.S. coverage. Total grant award: $3.78M. Grant range for projects with at least some U.S. coverage: $30,909 to $200K | • Proposals for wetland habitat should be directed to NAWCA  
• Applicants should coordinate with Migratory Bird Joint Ventures  
• A pilot program that focuses on 13 target species also available, but target species rare in Clark County  
• Grant duration may be one or two years |
| North American Wetlands Conservation Act – Small Grants Program U.S. Fish and Wildlife Service Migratory Bird Division in coordination with U.S. Habitat Joint Ventures | Provides matching grants to protect, restore, and/or enhance wetlands and associated upland habitats for the benefit of wetlands-associated birds and other wildlife | • Acquisition/preservation  
• Restoration/enhancement  
• Design  
• Administration (most competitive grants keep admin and other indirect costs below 20%) | Max: $75k  
Min: 1:1 | Annual (1X/Year)  
Oct. Deadline | Funding Level authorized up to $5M nationally; Min. $3M approved for FY 2012 | • Program created to encourage new grantees to participate in NAWCA  
• Adheres to same general purpose and guidelines as Standard Program  
• Evaluation criteria reward projects that are part of larger conservation initiative  
• Projects with upland acres must have “reasonable balance” with wetlands  
• Acquired lands (including match) usually require cons. easements |
| North American Wetlands Conservation Act – Standard Grants Program U.S. Fish and Wildlife Service Migratory Bird Division in coordination with U.S. Habitat Joint Ventures | Provides matching grants to protect, restore, and/or enhance wetlands and associated upland habitats for the benefit of wetlands-associated birds and other wildlife | • Acquisition/preservation  
• Restoration/enhancement  
• Design  
• Administration (most competitive grants keep admin and other indirect costs below 20%) | Generally $1M  
Min: 1:1 | Annual (2X/Year)  
March and Oct. Deadlines | • Multiple NAWCA projects funded in Clark County (e.g., Lacamas Shoreline, South V. Lake) |

| **Wetlands Reserve Program – Restoration Cost-Share Agreement** | Provides technical and financial support to eligible landowners to re-establish lost or degraded wetland habitat on marginal farmlands. Term of agreement is generally for minimum of 10 years. No easement is placed on land. | • Restoration  
• Technical Support | Max: $50k/year per entity  
NRCS pays 75% of restoration costs. | Applications accepted through continuous sign-up | WA received about $4M annually to support WRP | • WRP authorized in federal Farm Bill; Farm Bill expired Oct. 2012  
• Some FB reauthorizations allowed Restoration Cost-Share Agreements on “non-federal” public lands; however the most recent bill did not  
• County used program funds at La Center Bottoms and South V. Lake while eligible |
| **Whole Watershed Restoration Initiative**          | Provides matching funds to restore major ecological functions in OR, WA, and Idaho by investing in community-based groups to carry out on-the-ground restoration. Funding is focused on Pacific salmon and steelhead ecosystems, and priority watersheds have been identified. These include in Clark County East Fork Lewis | • Restoration (examples)  
• Remove culverts  
• Breach or remove levees  
• Decommission roads  
• Restore stream complexity  
• Restore riparian areas  
Projects should focus on on-the-ground restoration but may include design, feasibility analysis, outreach, education, and monitoring | Min: $20K  
Max: $100k | 50% match encouraged; projects with less match still eligible | Annual (Deadline for 2013 projects: 12/17/12) | Annual funding pool: $1-$2M.  
2012: $1.3M | • Projects that can be completed in 2013 may be given priority; all projects must be completed within 24 months of the award start date  
• Only projects in designated priority basins will be considered (These include East Fork Lewis.)  
• Projects will likely receive federal $ and must comply with all applicable permit and other requirements  
• Strongest projects are typically part of adopted restoration action plan, salmon recovery plan, etc. |
| **WWRP – Critical Habitat: WA Recreation and Conservation Office** | Acquire, create, or enhance habitat for wildlife including game and non-game species; food fish; shellfish; and freshwater, anadromous, and other fish including habitat for endangered, threatened, or sensitive species | • Acquisition/preservation  
• Restoration/Enhancement  
• Development (limited):  
• Benches/tables  
• Interpretive kiosks/signs  
• Paths/roads/parking  
• Restrooms  
• Site Stewardship Plan  
• Viewing shelters | None | Min. 50% total project  
At least 10% of total project cost must come from non-state, non-federal sources | Every 2 years, in even years | FY 2012: 2 projects fully funded @ $4.2 million & $2.75 million; one project partly funded @ $1,867,300.  
Legislature determines biennial WWRP budget; average amount $55 M; @ 55M CH receives $9,821,250 (see RCO Manual 10a –Appendix A: Allocation of WWRP funds). | • Sponsors must submit adopted habitat conservation plan  
• Sites may include public use for “consumptive and non-consumptive” activities.  
• Sites may restrict public use to protect habitat and species  
• Acq. may be fee or less than fee  
• Lands acquired in fee must be dedicated in perpetuity for habitat conservation by Deed of Right |

</table>
Conservation Futures

Purpose
To acquire, conserve, and maintain open space, farm, and timber land threatened by growth and the spread of urban development

Administering Agency
Counties

Program Description
RCW 84.34 allows boards of county commissioners to authorize by resolution a property tax up to 6 ¼ cents per $1,000 assessed valuation for the purpose of acquiring fee simple or lesser interest in farm, forest, and open space lands (as defined in RCW 84.34.020), and for the maintenance and operation of any property acquired with these funds. The amount of revenue used for maintenance and operation may not exceed 15% of the total amount collected in the preceding calendar year. Funds may be used to acquire mineral rights, and leaseback agreements are permitted. The statute prohibits the use of eminent domain.

Agencies eligible to spend conservation futures funds under provisions of the legislation include any county, city, town, metropolitan park district, metropolitan municipal corporation, nonprofit historic preservation corporation as defined in RCW 64.04.130, or nonprofit nature conservancy corporation as defined in RCW 84.34.250. Counties with over 100,000 population shall develop a process to help ensure the taxes levied are distributed, over time, throughout the county.

Clark County enacted its Conservation Futures program in October 1985. The County has prepared a Conservation Futures-Legacy Lands Program Guidance Manual that provides additional information about program details and the process used to select and implement projects.

Fund Capacity
Conservation Futures revenues are collected inside and outside city limits. In 2011, the countywide collections were approximately $2.35 million. The Washington State Department of Revenue advises that Conservation Futures levies are subject to the 101% limitation under chapter 84.55 RCW.

Comments
- Conservation Futures funds have helped acquire some of Clark County’s most important habitat and regional recreation lands, including Camp Currie, Eagle Island, Lucia Falls, Frenchman’s Bar, and the Salmon Creek, Lower Washougal, Burnt Bridge Creek, and Lower East Fork Lewis Greenways.

- Most towns and cities in Clark County and one nonprofit nature conservancy organization, as well as Clark County itself, have used Conservation Futures funds to acquire high-value projects; these occur both inside and outside city limits.

- See RCW 84.34.200-250
Bonds

Purpose
Provides method for counties and other taxing jurisdictions to borrow money to finance capital projects, such as land acquisition and facility construction, through the issuance of voted or non-voted general obligation bonds

Administering Agency
Counties and Other Taxing Jurisdictions (program description focuses on counties).

Program Description
For the purposes of funding capital projects, such as land acquisitions and facility constructions, counties have the authority to borrow money by selling bonds. Three general types of bonds may be sold: voter approved general obligation bonds; agency approved or councilmanic bonds; and revenue bonds.

- Voter-approved General Obligation Bonds: These bonds may be sold only after receiving a 60 percent majority vote at a general or special election. In addition to this “supermajority” approval requirement, voter turnout must be at least 40 percent of the number of voters who cast votes in the last general election (known as validation). If approved, an excess property tax is levied each year for the life of the bond—typically 20 years or the life of the asset if less than 20 years—to pay both principal and interest. The maximum debt limit for voter approved bonds is two and one-half percent of the value of taxable property in the county.

- Councilmanic Bonds: These bonds may be sold by counties without public vote. The bonds—both principal and interest—are retired with payments from existing county revenue, such as Conservation Futures, or new general tax revenue, such as additional sales tax or real estate excise tax. Two limits apply to councilmanic bonds. 1) the Legislature has set a maximum debt limit for councilmanic bonds at three-fourths of one percent of the value of taxable property within the county. 2) Clark County fiscal policy states that no more than 10 percent of the county’s operating budget shall be used to service debt.

- Revenue Bonds: These bonds are sold with the intent of paying principal and interest from revenue generated by the improvement, such as fees and charges. For example, revenue bonds might be sold to fund a public water system that will generate revenue through utility charges to customers. Other funds may be dedicated to assist with repayment; however, it is desirable to have the improvements generate adequate revenue to pay all bond costs. Limits on the use and amount of revenue bonds are generally market-driven through investor faith in the adequacy of the revenue stream to support the bond payments.
Fund Capacity

- Voter-Approved GO Bonds: The maximum debt limit for voter-approved general obligation bonds is two and one-half percent of the value of all taxable property in the county. Clark County’s 2011 countywide voter-approved bond capacity was $933,876,823. The current fund capacity is the maximum debt limit, less debt outstanding at the time of issuance of the bonds.

- Councilmanic Bonds: The maximum debt limit for non-voter approved general obligation bonds is three-fourths of one percent of all taxable property in the county. Clark County’s 2011 countywide non-voter-approved bond capacity was $280,163,047. The current fund capacity is the maximum debt limit, less debt outstanding at the time of issuance of the bonds. (Clark County has issued councilmanic bonds on four occasions to help acquire high-value conservation lands, using Conservation Futures revenues to retire the bonds.)

- Revenue Bonds: These bonds would not be appropriate for conservation lands acquisition since they are based on the concept that revenue generated by the improvement will retire the debt.
Impact Fees

Purpose
The Washington State Growth Management Act authorizes cities, towns, and counties that plan under the act to place fees on new development to help finance certain public facilities that are addressed by a capital facilities element of a comprehensive land-use plan. These public facilities specifically include “publicly owned parks, open space, and recreation facilities.”

Administering Agency
Counties, Towns and Cities

Program Description
Impact fees are charges placed on new development to help pay a prorata share of various public facilities the need for which is directly created by that new growth and development. GMA impact fees may be imposed only for system improvements that are reasonably related to and that benefit the new development. The fees cannot exceed a proportionate share of the costs of system improvements for the new development. The local ordinance that enacts the fees shall specify the amount to be imposed for each type of system improvement, and shall be based on a formula or other method for calculating the fees. The fees must be expended within 10 years, unless there is an extraordinary or compelling reason for the fees to be held longer.

Clark County's impact fee program became effective in September 1990. Fees are collected on both single- and multi-family residential development in the Vancouver urban area. The urban area is divided into 10 districts for purposes of collecting park impact fees, and fees collected in a particular district must be spent in that district. Impact fees support the acquisition and development for three categories of park land: neighborhood parks, community parks, and urban open space. As part of the fee collection program, the city and county must provide a "proportionate public share" to help reduce existing deficits of urban parkland for the current population.

Fund Capacity
The current impact fee schedule for acquisition and development became effective in June 2002 and January 2003 respectively. The numbers below show the per-unit fees within the 10 park districts. Development fees are uniform across the 10 districts; acquisition fees vary and are expressed below as a low-to-high range.
SFR: Acquisition: $1,094 to $2,228. Development $440
MFR - Acquisition: $806 to $1,628. Development: $321

Comments
- The impact fee program provides direct funding for the acquisition of urban open space; the program also provides cost-sharing opportunities with fund sources such as Conservation Futures.
- See RCW 82.02.050 – 82.02.100
Property Tax – Lid Lift

Purpose
Provides process to exceed, with voter approval, the 1% limit on annual property tax levies to generate revenue for general or specified purposes; these purposes may include the acquisition, improvement, and stewardship of conservation areas.

Administering Agency
Counties et.al (program description focuses on counties).

Program Description
Counties are authorized to impose two ad valorem (non-voted) taxes upon real and personal property: a tax for general county purposes and a tax for road purposes. The county’s tax levy for road district purposes may not exceed $2.25 per thousand dollars of assessed value. The county’s tax levy for general purposes may not exceed $1.80 per thousand dollars of assessed value.

The authority to tax real and personal property is further limited in two ways:

1. The aggregate rate of all taxing districts, other than state, cannot exceed $5.90 per thousand dollars of assessed value. Some tax levies are excluded from the computation of this aggregate rate such as ports, public utility districts, and conservation futures. If the limit is exceeded, state statute governs reductions in specific taxing district levies until the combined rate of $5.90 is achieved. The levy reduction process protects the county’s certified tax rate.

2. Levy increases for municipalities with a population of 10,000 or more are limited to the lesser of one percent or the increase in the July implicit price deflator for personal consumption expenditures as published in the September issue of the Survey of Current Business.

One exception to the one percent rule is the levy lid lift provided for in RCW 84.55.050. Taxing jurisdictions with a tax rate that is less than their statutory maximum may ask voters to “lift” the levy lid by increasing the tax rate to some amount equal to or less than their statutory maximum rate. There are two options, and in each case a simple majority vote is required:

Option 1: This proposed lid lift may be done for any purpose, and the purpose may be stated in the ballot title but does not have to be. The lid lift can be for any amount of time, unless the proceeds will be used to pay off debt service on bonds, in which case the maximum time period is nine years. If the lift is to be permanent, the ballot title must include language that states the lift is permanent. After the initial lid lift, the jurisdiction’s levy in future years is subject to the 101 percent limitation on new revenues. The election may take place on any election date listed in RCW 29A.04.321.

Option 2: This lid lift may be done for any purpose, but the purpose must be stated in the ballot title. The lid may be “bumped up” each year for up to six years. The lift for the first year must
state the new tax rate for that year. For the ensuing years, the lift may be a dollar amount, a percentage increase amount tied to an index such as the CPI, or a percentage amount set by some other method, and the amounts do not need to be the same for each year. At the end of the specified period, the levy in the final period may be designated as the base amount for the calculation of all future levy increases if expressly stated in the ballot title. The election date must be the August primary or the November general election as provided in RCW 84.55.050(2) (a).

Fund Capacity
The county’s general purpose property tax is collected countywide. The 2011 countywide assessed value of real and personal property was $37,355,072,941. A rate increase of one cent per thousand dollars AV would have generated $373,551.

Comments
See RCW 84.55.050
Real Estate Excise Tax

Purpose
Provides mechanisms to finance capital projects by imposing excise taxes on the sale of real property; authorized expenditures include acquisition and development of parks and recreation facilities, as well as acquisition and maintenance of conservation areas.

Administering Agency
Counties, Cities, and Towns (program description focuses on counties).

Program Description
Chapter 82.46 of the Revised Code of Washington authorizes the governing bodies of counties—and cities—to impose excise taxes on the sale of real property within limits set by the statute. The authority of counties may be divided into four parts:

1. The Board of County Commissioners may impose a real estate excise tax on the sale of all real property in the unincorporated parts of the county at a rate not to exceed ¼ of 1% of the selling price to fund “capital projects” that are specified in a capital facilities plan of a county’s comprehensive plan. Capital projects means those public works projects of a local government for planning, acquisition, construction, reconstruction, repair, replacement, rehabilitation of parks, recreational facilities, trails, roads, streets, domestic water systems, etc. This tax option includes the acquisition of real and personal property associated with such local improvements.

2. The Board of County Commissioners may impose a real estate excise tax on the sale of all real property in the unincorporated parts of the county at a rate not to exceed ½ of 1%, in lieu of a five-tenths of one percent sales tax option authorized under RCW 82.14.030(2). These funds are not restricted to capital projects. The statute provides for a repeal mechanism. However, this levy is not available to Clark County, because it has implemented a portion of the discretionary sales tax option.

3. Boards of County Commissioners in counties that are required to plan under the Growth Management Act may impose an additional real estate excise tax on all real property sales in the unincorporated part of the county at a rate not to exceed ¼ of 1%. These funds must be used for financing capital projects specified in a capital facilities plan element of a comprehensive plan. These funds may be used for the planning, construction, reconstruction, repair, rehabilitation, or improvement of parks. However, these funds may not be used for the acquisition of park land, though they may be used to acquire land for streets, roads, water systems, and other capital projects.

4. Boards of County Commissioners may also impose—with voter approval—a real estate excise tax on each sale of real property in the county at a rate not to exceed 1% of the selling price for the specific purpose of acquiring and maintaining “local conservation areas.” This tax is applied both inside and outside city limits. (A separate summary has been prepared for this program.)
Funding Capacity
The amount of revenue generated by a real estate excise tax fluctuates with the sale of real property. In 2011, a ¼ of 1% real estate excise tax in the unincorporated part of Clark County generated approximately $1,555,000; a ¼ of 1% real estate excise tax collected countywide, including towns and cites, generated $3.4 million.

Comments
 Portions of the first and second ¼ of 1% tax options described above may be used for operations and maintenance. From July 22, 2011, until December 31, 2016, a city or county may use the greater of one hundred thousand dollars or thirty-five percent of available funds, but not to exceed one million dollars, for the operations and maintenance of existing capital projects as described for each respective tax option.
Real Estate Excise Tax – Conservation Areas

Purpose
To acquire and maintain land and water that has environmental, agricultural, aesthetic, cultural, scientific historic, scenic, or low-intensity recreational value for existing and future generations.

Administering Agency
Clark County

Program Description
RCW 84.46.070 allows Boards of County Commissioners to impose—with voter approval—an excise tax on each sale of real property in the county at a rate not to exceed one percent of the selling price for the purpose of acquiring and maintaining conservation areas. Conservation areas are defined in RCW 36.32.570 and include: “land and water that has environmental, agricultural, aesthetic, cultural, scientific, historic, scenic, or low-intensity recreational value for existing and future generations, and includes, but is not limited to, open spaces, wetlands, marshes, aquifer recharge areas, shoreline areas, natural areas, and other lands and waters that are important to preserve flora and fauna.”

Funds under this program are collected both inside and outside city limits, and the tax must be approved by majority vote. Two methods may be used to place this tax measure on the ballot. (1) The county legislative authority may initiate a vote by adopting a resolution proposing the action; or (2) the vote can be initiated through a petition process whereby petitions are signed by county voters at least equal in number to 10% of the total number of voters voting in the last general election. The ballot proposition must be submitted to voters at the next general election occurring at least 60 days after a petition is filed, or at any special election prior to this general election that has been called for such purpose by the county’s legislative authority. A plan for the expenditure of the excise tax proceeds shall be prepared by the county at least 60 days before the election of the proposal by resolution of the county legislative authority, or within six months after the tax has been authorized by voters if the if the proposal is initiated by petition.

Funding Capacity
The amount of revenue generated by a real estate excise tax fluctuates with the sale of real property in the county. In 2011, a ¼ of 1% real estate excise tax applied countywide, including towns and cities, would have generated approximately $3.4 million.

Comments

- Counties shall consult towns and cities prior to adoption of the acquisition plan
- A public hearing shall be held to obtain public comment
- The acquisition may include fee simple or lesser interest
- The tax is the obligation of the purchaser
Trust Land Transfer (TLT)

Purpose
Provides an innovative way for DNR to transfer to other public agencies or programs Common School Trust Lands that have under-performing income potential but that have important social and/or ecological values such as wildlife habitat, open space, outdoor education, and recreation.

Administering Agency
Washington State Department of Natural Resources (DNR)

Program Description
To implement the program, DNR compiles and prioritizes a proposed list of properties for TLT consideration. The list identifies an appropriate and receptive public agency or program to receive the properties, and DNR appraisal staff estimates the land and timber values. The list is presented to the Board of Natural Resources and then the Governor’s Office for submittal to the Legislature, which determines the make-up of the final package.

If approved, the transfer package is authorized and funded as part of the Capital Budget. At transfer, the timber (or lease) value of the property is deposited into the Common School Construction Account to help fund school construction (K-12); the land value is deposited into the Real Property Replacement Account to acquire other properties that will produce income for the Common School Trust. Primary program benefits include:

- Provides funds for public school construction
- Provides funds for acquisition of productive commercial, agricultural, and foresland to increase revenues for the Common School Trust
- Disposes of underperforming Common School Trust Lands
- Transfers to designated public agencies select lands with statewide significance for fish and wildlife habitat, recreation, natural resource conservation, and similar values

Fund Capacity
TLT started during 1989-91 biennium. Legislature provided some level of funding for all biennia, except 1995-97. The biennial appropriations have ranged from $34,500,000 (1997-99) to $171,500,000 (1989-91). Total appropriations from 1989-2011 amounted to $738,080,000.

Comments
- Candidate properties in aggregate must have a high timber to land value to ensure the greater part of the appropriation is deposited directly to fund school construction in current biennium
- TLT program has transferred or leased land and timber to DNR Natural Areas Program, Washington State Parks, city and county governments, local public park districts, and to Washington State Department of Fish and Wildlife
- Projects in Clark County include Woodland Campground (fee) and Washougal River (lease)
Columbia River Estuary Mitigation – Bonneville Power Administration

Purpose
Funding is available for projects that help mitigate for the construction and operation of the dams on the mainstem Columbia and Snake Rivers – referred to as the Federal Columbia River Power System.

Administrating Agency
Bonneville Power Administration (BPA) and U.S. Army Corp of Engineers

Program Description
BPA and the Corp provide funding for restoration projects and acquisition projects that will lead to restoration as part of ongoing efforts to protect, restore and enhance habitat for coho, Chinook, steelhead and cutthroat trout, as well as for black bear, elk, and river otter and other species. In particular, BPA seeks to provide funding for projects that would satisfy some of BPA’s mitigation requirements for the Columbia River estuary as identified in the National Marine Fisheries Service 2008 Biological Opinion that guides the protection of salmon and steelhead listed under the federal Endangered Species Act.

Potential projects are evaluated by the Expert Regional Technical Group (ERTG) and assigned a survival benefit unit (SBU) score based on the projects benefit to ocean- and stream-type juvenile salmon. Projects that will restore fish access to historic floodplain areas in tidally influenced areas tend to score the highest and as a result be most likely to be funded. BPA’s mitigation needs are focused on stocks of fish migrating past the dam system. Projects outside of the mainstem Columbia River and lower ends of tidally influenced tributaries are unlikely to be seen as a priority.

Several organizations have relationships with BPA and can serve as good entry points for potential projects. The Lower Columbia River Estuary Partnership has a long standing relationship with BPA and administers a grant solicitation for on the ground projects that relies on BPA funding. Washington Department of Fish and Wildlife has a Memorandum of Understanding with BPA that provides for project funding with the state. Columbia Land Trust and Columbia River Estuary Study Taskforce both have ongoing contracts with BPA for acquisition and restoration projects. Clark County (as well as other agencies and organizations in the area) can apply for funding for eligible projects through the Lower Columbia River Estuary Partnership, and can also work with the Columbia Land Trust to develop partnership projects that utilize these funds.

Fund Capacity
BPA must complete the mitigation requirements identified in the National Marine Fisheries Service 2008 Biological Opinion by 2018. The exact amount of funding available at any given time will depend on BPA annual budgets, but until the mitigation needs are met it is likely that funding will be available for high priority projects.
Private Sector Grants and Funding Opportunities

In addition to the public funding sources listed above, there are a myriad of private funding sources that may be available to assist with conservation lands acquisition and improvement. Private funding sources are often much smaller in scope than public sources, but they can provide important contributions to certain portions of projects, including funds necessary to match public contributions.

Here are two examples of private funding sources specifically dedicated to Clark County conservation and improvement projects:

- The Community Foundation of Southwest Washington manages the East Fork Lewis Legacy Fund which was established to support conservation and trail development work on the East Fork Lewis River.

- Columbia Land Trust currently holds a small fund established by a private donation that is dedicated to improvements in Whipple Creek Regional Park.

There are a number of private foundations that support conservation work in the region. These foundations often focus on capacity building or programmatic objectives as opposed to a specific acquisition or restoration project. Some private funding sources are also easier to access by non-governmental organizations. In general, partnership and community supported projects are more likely to align with private funding opportunities.
Appendix E – Legacy Lands Acquisition History

The conservation futures levy enacted by the Board of County Commissioners in 1985 has been a primary local source of revenue for Legacy Lands acquisitions. This appendix provides a list of acquisitions where conservation futures revenue has been an important component, often leveraged with other resources such as grants, donations of land value and partner contributions. The table does not include acquisitions via other means, such as the state Department of Natural Resources Trust Land Transfer Program, or conservation acquisitions by other entities and organizations with their own resources, which have also been important in assembling the current conservation lands system in Clark County.

**Planning Process Self Certification Form (Form #222)**

Use this form to certify that the need for your projects have been determined through an appropriate planning process. Provide the completed form with the subject plans (on CD-ROM) and adoption documentation to RCO.

**Name and adoption date of documents submitted in fulfillment of this requirement:**

- 
- 
- 

<table>
<thead>
<tr>
<th>Check or Initial Each to Certify Completion</th>
<th>Plan Element Certification</th>
<th>Document and Page Number Location of Information</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. Goals, objectives:</strong> The attached plan supports our project with broad statements of intent (goals) and measures that describe when these intents will be attained (objectives). Goals may include a higher level of service.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2. Inventory:</strong> The plan includes a description of the service area’s facilities, lands, programs, and their condition. <em>(This may be done in a quantitative format, or in a qualitative/narrative format.)</em></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>3. Public involvement:</strong> The planning process gave the public ample opportunity to be involved in plan development and adoption.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| **4a. Demand and need analysis:** In the plans:  
  - An analysis defines priorities, as appropriate, for acquisition, development, preservation, enhancement, management, etc., and explains why these actions are needed.  
  - The process used in developing the analysis assessed community desires for parks, recreation, open space, and/or habitat, as appropriate, in a manner appropriate for the service area (personal observation, informal talks, formal survey(s), workshops, etc.). |
| **4b. Level of Service assessment (optional):** An assessment of the criterion appropriate to your community. Possibly establish a higher level of service as a plan goal (above). |
| **5. Capital Improvement Program:** The plans includes a capital improvement/facility program that lists land acquisition, development, and renovation projects by year of anticipated implementation; include funding source. The program includes any capital project submitted to RCFB for funding. |
| **6. Adoption:** The plans and process has received formal governing body approval *(that is, city/county department head, district ranger, regional manager/supervisor, etc., as appropriate).* Attach resolution, letter, or other adoption instrument. |
I certify that this information is true and complete to the best of my knowledge,
