Webinar: Wildfires in Western Washington, A Different Animal

Tuesday – June 30, 2020
6PM–8PM

Understand the risks. Learn how to prepare. Take action.

Many believe that fire is not a concern west of the Cascades. While it's true that greater rainfall makes these forests more fire-resilient, it also inherently means greater fuel loads will be available when fires do occur. As the climate continues to change and we experience hotter summers and longer dry periods, catastrophic wildfires may become a more pressing concern on the west side. This is an alarming thought but learning more about how these fires behave is the first step to being prepared.

Attend this **FREE** webinar to hear Daniel Donato (WADNR/UW) discuss the current science on western Washington wildfires followed by Ashley Blazina (WADNR), who will talk about the best practices for protecting your home.

A high-speed internet connection is needed to view this webinar. Dial-up will not work. **IMPORTANT:** Due to increased security, you must have your own Zoom account to participate. You can easily create a free Zoom account if you do not already have one. Please register and have your Zoom account set up at least two hours prior to the webinar.

For more information and to learn how to register, go to forestry.wsu.edu.

Questions? Contact Patrick Shults at 360-740-1213 or patrick.shults@wsu.edu

Reasonable accommodations will be made for persons with disabilities and special needs. To request accommodations, you must contact WSU Extension at least two weeks in advance. Extension programs and policies are consistent with federal and state laws and regulations on nondiscrimination regarding race, sex, religion, age, color, creed, national or ethnic origin; physical, mental or sensory disability; marital status, sexual orientation, or status as a Vietnam-era or disabled veteran. Evidence of noncompliance may be reported through your local Extension office.
