## Learn about **Home Innovation and Safety**

Smart home innovation that supports independent living can assist those who wish to remain in their homes as long as possible. Sue Doyle, a local occupational therapist and certified aging in place specialist, will speak about the unique role of occupational therapy in maintaining independence, injury prevention and the technological tools that can enable seniors to function effectively in their homes.

Doyle has been an occupational therapist for more than 35 years. She has a private practice in Battle Ground where she sees patients who need help achieving their optimal participation and maximizing their ability to stay at home longer.
