Congestion management

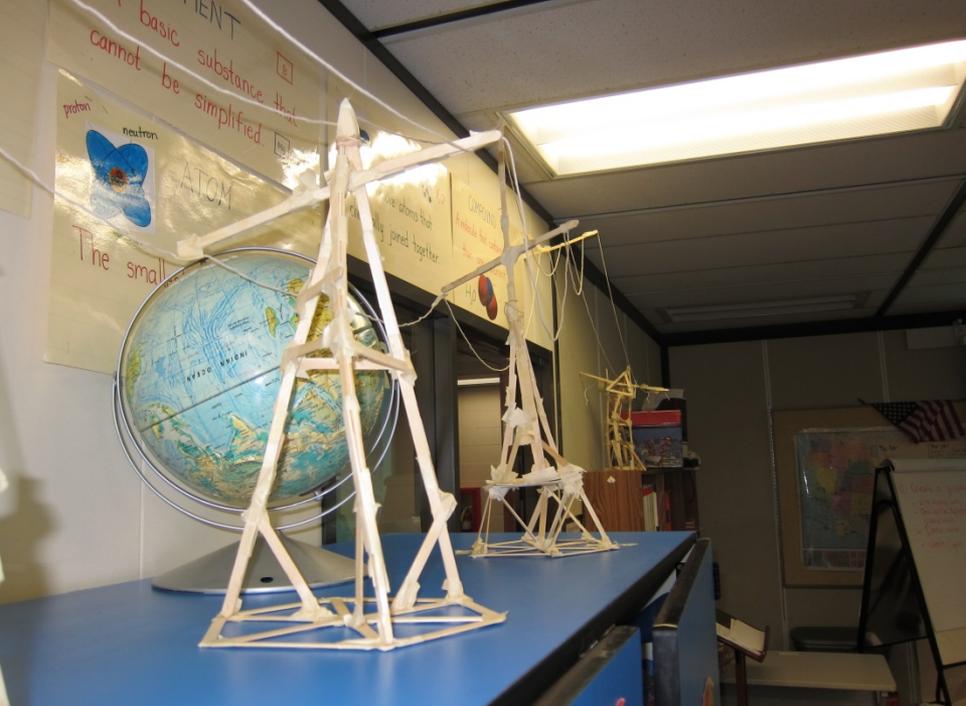

- BPA is exploring options on how to address congestion on our transmission system in southwest Washington and northwest Oregon.
- One option is a new transmission line between Castle Rock, Was. and Troutdale, Ore.
- Other options include using non-wires tools like demand response or peak reduction to manage the use.
- All options have financial and reliability implications.

Ross Maintenance HQ Construction

- BPA broke ground for the new facility this summer.
- Construction scheduled to be complete by summer of 2017.
- Work on the project will impact traffic on Minnehaha Street periodically for the next two months.
